Measurements are sent wirelessly to your mobile device and can be viewed using free to download the MiBody App. Trends can be tracked overtime and measurements are explained with a healthy/recommended range. The results are stored on your personal mobile device and are private unless you choose to share your achievements. MiBody should be used in addition to and not as a substitute for professional medical guidance. If you are concerned about aspects of your health, please seek a professional medical guide. HOW DOES THIS SALTER SCALE WORK? This Salter scale uses BIA (Bio Impedance Analysis) technology that passes small electrical impulses through the body to determine the fat from lean tissue, the electrical boost cannot be felt and is very safe. Contact with the body is made through stainless steel bearings on the scale platform. This method simultaneously calculates your personal weight, body fat, total body water, BMI and muscle mass, giving you a more accurate reading of your overall health and fitness. This scale stores personal data for up to 4 users. In addition to being an analyst scale, this scale can be used as a conventional scale. PREPARE YOUR SCALE 1. Open the battery compartment on the lower scale.2. Remove the isolation tab from under the battery (if installed) or insert a battery that observes polarity signs (+ and -) in the battery compartment. 3. Close the battery compartment. 4. Select the weight mode kg, st or lb with the switch at the bottom of the scale. 5. For use in carpets, remove the nonslipping pads from the scale legs and attach the covered carpet feet. 6.
